PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building and deploying full-stack web applications using TypeScript, JavaScript, React.js, Next.js, Node.js, and Express.js. Strong foundation in Data Structures & Algorithms, OOP, REST APIs, authentication, and database design. Experienced in building practical features, integrating AI APIs, and developing clean, responsive applications. Solved 500+ algorithmic problems, including 450+ on Codeforces.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), C/C++, Python, Java, PHP, SQL
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion, Responsive Design
- **Backend:** Node.js, Express.js, Django, REST APIs, JWT, Better Auth
- **Databases:** MongoDB, PostgreSQL, MySQL, Database Design, 3NF
- **AI & Tools:** Google Gemini Vision API, Git/GitHub, Postman, Vercel, Render
- **Core:** Data Structures & Algorithms, OOP, Problem Solving

SELECTED PROJECTS

Table – Ebook Marketplace & Reading Platform

[Live] | [GitHub]

React.js, Next.js, Node.js, Express.js, MongoDB, Stripe, Better Auth

- Built a full-stack ebook marketplace with separate reader and author workflows, authentication, dashboards, content management, and reading features.
- Developed REST APIs with MongoDB for user data, ebooks, orders, reading progress, and bookmarking, with role-based access control.
- Integrated Stripe Checkout and built responsive interfaces for browsing, purchasing, reading, and managing ebooks.

DriveFleet – Vehicle Management & Booking Platform

[Live] | [GitHub]

Next.js 15, React.js, TypeScript, Node.js, Express.js, MongoDB, Better Auth

- Developed vehicle listing, booking, availability, reservation, cancellation, and fleet management features with REST APIs and MongoDB.
- Implemented authentication, protected routes, and frontend-backend integration for secure booking and dashboard workflows.
- Built reusable, responsive components with a mobile-first approach for listings, filters, booking, and management pages.

W2A Intelligence – AI-Powered Resource Allocation System

[Live] | [GitHub]

Next.js, React.js, MySQL, Tailwind CSS, Google Gemini Vision API

- Built an SQL-based matching system to connect waste lots with suitable recyclers using a normalized relational database.
- Integrated Gemini Vision API for image-based material analysis and connected AI results with application workflows and impact calculations.

EXPERIENCE

Intern

June 2026 – Present

Bangladesh Youth Skill Development Organization (BYSDO)

- Developing professional skills through teamwork, communication, presentations, leadership activities, and collaborative work.

Executive, CSE Department Development Club

2025 – Present

Comilla University, Bangladesh

- Support coding activities, technical workshops, peer-learning sessions, and student-focused technical events.

ACHIEVEMENTS & CERTIFICATION

- **1st Runner-Up:** PROTICHAMP AI Championship 1.0 – Environment & Sustainability Track, 2026 [Certificate]
- **Top 20 Finalist:** NEXT-Gen Hackathon 2025 [Certificate]
- **Quarter Final Round:** National ICT Olympiad 2026 [Certificate]
- **Competitive Programming:** 500+ problems solved, including 450+ on Codeforces [Codeforces]
- **MERN Stack Development:** Complete Web Development Course, Programming Hero [Certificate]

EDUCATION

Bachelor of Science in Computer Science and Engineering

Expected June 2027

Comilla University, Bangladesh

4th Year

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Web Technology, Software Engineering, Cryptography and Network Security, Artificial Intelligence and Neural Networks
